A Seminar for Faith Leaders on End-of-Life Care

Partners in Caring

November 1, 2018

8:00 AM - 4:30 PM

**Sierra Health Foundation
1321 Garden Highway
Sacramento, CA**

Why this seminar?

Seriously ill and dying individuals and their families often turn to faith communities for support during their illness. Yet faith leaders may feel unprepared to care for people coping with complex medical, ethical and interpersonal issues that often surround a person's last days. This one-day seminar will help faith leaders gain greater confidence in supporting people at life's end. The seminar will help bridge medical and ethical concepts with the spiritual aspects of end-of-life care. Faculty include practicing health professionals and faith leaders.
